Equipment

At the centre of any alarm system is the control panel. The control panel is the key to operating the whole system and is therefore essential that you select the right panel to protect your property.

The Matrix 832+ from Pyronix offers 16 zone protection, which will provide you with reliable and effective intruder detection.

Features

- 8 fully programmable zones (expandable to 16 zones), with 2 additional global tamper and bell tamper zones
- 4 true partitions
- 4 arm Modes per partition enabling the system to be part armed in various combinations
- Event log which conforms to the ABI (Association of British Insurers) guidelines
- Built in communicator to facilitate connection to an Alarm Receiving Centre
- Upload / Download facility which allows remote modifications to be made to your system without the need for your installer to visit.
- Fully DD243 compliant

The Pyronix Matrix 832+

SPECIFICATIONS

Fully Programmable Zones

The 8 fully programmable zones (expandable to 16) with 4 arm modes allow the system to be tailored to meet your individual requirements. This gives you the flexibility to protect various areas of your premises whilst leaving others free for you to move around.

Partitions

The system can be divided into 4 fully independent subsystems each with its own individual keypads, zones, user codes, arm modes and partitioning options. Therefore, the Matrix can be used to cover 4 independent flats or shops.

Event Log

The 300 event log stores not only about alarm activations but also which user arms and disarms the system and conforms to the ABI (Association of British Insurers) guidelines.

Remote Keypads / Proximity Readers

The system can be armed / disarmed by using either a 32 character LCD keypad or a Proximity Reader. Both devices are extremely easy to operate - the LCD keypad allows you to enter user names and zone descriptions and the Proximity Reader is simply operated by simply holding a card or tag to the reader.

Programming

The Up/ Downloading facility allows your installer to programme your control panel remotely, avoiding disruption to you. N.B Remote setting requires you to give permission to the installer by disclosing your user code.

Alarm Receiving Centre (ARC)

The Matrix 832+ may connected to an Alarm Receiving Centre which are staffed 24 hours a day 365 days a year. The Alarm Receiving Centre will immediately be aware of any activation and take the appropriate action.

DD243 Compliant

Any security system requiring police response installed after 1st July 2002 must comply with BSI DD 243: 2002. This is a code of practice for the installation and confirmation of intruder alarm systems designed to generate confirmed alarm conditions.

Optional Voice Module

In the event of one of a number of alarm conditions, a voice message can be sent to your phone.

The Matrix 832+ is an extremely versatile system with a wide range of peripherals, please contact your installer for further information.
